Harry- Per paragraph 45 of the Unilateral Administrative Order, Lockheed Martin must notify EPA 24 hours in advance of accessing the site. During our September 11, 2012 meeting with EPA we noted that our contractor must access the site on a frequent basis to do work required under the CERCLA Consent Decree, the RCRA permit, and the NPDES permit. Per our agreement, here are the routine tasks:

- Semi-annual groundwater monitoring (September and March)
- Quarterly monitoring of monitoring well depth to water (March, June, September, December)
- Quarterly inspections of the LCS and associated landfill covers (March, June, September, December)
- Bi-weekly checks on the volume in the CERCLA treatment tank, containment area and lift station flow meters
- Addition of nutrients for CERCLA leachate treatment – weekly check
- Checking gate security – ongoing
